

Jason Choo Jie Sern

Software Engineer

jason.choo2004@gmail.com · Penang, Malaysia · github.com/JJasXS · [LinkedIn](#)

SUMMARY

Software Engineer building practical business systems with C#/.NET, Python, and SQL, including SQL Account ERP integrations. Thrilled to learn and explore new things while shipping reliable apps and supporting deployment in a strong engineering team.

EXPERIENCE

Software Engineer

Feb 2026 - Present (7 mo)

Procc System Consulting · *Intern Feb-Jun 2026, converted to full-time*

- Own and enhance production business systems (ProAcc eScan, Appointment Booking, eApproval, eQuote Hub, Auto Emailing) built with C#/.NET, Python, HTML/CSS, and JavaScript.
- Connect custom apps to SQL Account ERP so quotation, procurement, approval, stock, customer, and invoice workflows run as one connected process.
- Built ProAcc eScan (ASP.NET Core + Firebird) for real-time stock validation and location / project / last-scan updates; delivered PO/SO approval and goods-received flows with role-based access.
- Launched a procurement and quotation portal (Flask + FastAPI) with bidding screens and live SQL Account API integration.
- Design Windows Services that auto-generate and send scheduled Excel/PDF reports from Firebird data via SMTP; ship releases end to end including test, deploy, and user support.

Junior Software Engineer

2021 - 2022 (4 mo)

Penang Hill Corp

- Collaborated with a senior engineer to develop an internal meeting room booking system.
- Supported development, content updates, and day-to-day improvements for internal workflows.
- Worked with GitHub and Visual Studio Code as part of the team toolchain.

EDUCATION

Bachelor of Software Engineering

2024 - 2026

TAR UMT, Penang Branch · CGPA 3.0

Diploma in Information Technology

2021 - 2023
