SUMMARY

Software Engineer building practical business systems with C#/.NET, Python, and SQL, including SQL Account ERP integrations. Thrilled to learn and explore new things while shipping reliable apps and supporting deployment in a strong engineering team.

EXPERIENCE

Software Engineer
Feb 2026 - Present (9 mo)

ProAcc System Consulting (SEA) Sdn Bhd · *Full-time*

- Delivered ProAcc eScan (ASP.NET Core + Firebird): live stock validation with location, project, and last-scan updates.
- Engineered RFID stock inventory on ApprovalPO: Chainway C5 UHF handheld via SDK; one scan pass reads multiple tags and writes stock back without the ERP desktop.
- Shipped eApproval with role-based PO/SO approval and goods-received.
- Developed Appointment Booking for office scheduling and resource booking.
- Launched eQuotation (Flask + FastAPI), a procurement and quotation portal with bidding screens and live SQL Account API.
- Automated scheduled Excel/PDF reporting in Auto Emailing, a Windows Service that pulls Firebird data and sends it over SMTP.

Junior Software Engineer
2021 - 2022 (4 mo)

Penang Hill Corp

- Collaborated with a senior engineer to develop an internal meeting room booking system.
- Supported development, content updates, and day-to-day improvements for internal workflows.
- Worked with GitHub and Visual Studio Code as part of the team toolchain.

EDUCATION

Bachelor of Software Engineering
2024 - 2026

TAR UMT, Penang Branch · CGPA 3.0

Diploma in Information Technology
2021 - 2023

TAR UMT, Penang Branch · CGPA 3.3
